

NAZARII KHMIL

DATA ANALYST

Junior Data Analyst with a keen eye for detail and a passion for solving complex problems. Experienced in working with datasets and creating reports. Always eager to learn new tools and improve analytical skills.

PROJECT EXPERIENCE

Product Analytics with Amplitude

Conducted an in-depth analysis of user behavior using Amplitude.

Developed segmentation strategies by creating cohorts.

Designed interactive dashboards to support data-driven decision-making.

Provided actionable insights to optimize user retention and engagement.

Working with Dates and Window Functions in SQL

Used date functions to analyze time-based data.

Applied window functions to calculate running totals and ranking metrics.

Optimized SQL queries for improved performance.

WORK EXPERIENCE

Kyivstar

2019-now

I worked in the company in first-line support and second-line support positions.

On the first-line support, I assisted customers with using the company's services, helped set up mobile internet, calls, and also configured home internet.

In my role as a second-line support specialist, I developed skills in teamwork, handling customer service complaints, and effectively communicating with clients and colleagues. I provided technical support, made independent decisions, and took responsibility for problem-solving and task execution.

Additionally, I learned to understand and analyze processes related to billing, tariff management, and company services, which helps me resolve customer issues more efficiently and optimize workflows.

EDUCATION

IT School "GoIT"

Data Analyst

2024 - 2025

Lviv Polytechnic National University

Bachelor's degree Computer Science

2016 - 2019
